

Asian Filtration Technology : Manufacturers of All types of Industrial Filters

Mr. Ramesh Aghera

Asian Filtration Technology an **An ISO 9001 : 2015 Certified Co.** manufactures high quality Air Filters and Fuel Filters for Heavy earth moving machineries, Air Compressor, D.G. Set and Automobiles etc. The company has been developing new types of filter elements for screw compressors, vacuum pumps and pharmaceutical machineries. With German technical support the company is also developing Push-Push type HEPA, Inlet HEPA for isolators and PE sintered filters. The company was formed by Mr. Ramesh Aghera in the year 2006 after gaining an experience of 16 years in this field. The production facility was also commissioned in the same year. By 2011 the company reached a milestone of having business with 150+ regular clients. By now, the company has 350+ regular customers in various

industries.

The company manufactures customized filter elements as well as filter elements for replacement of reputed brands of compressor, heavy earth moving equipments, vacuum pumps, AHU industrial dust collectors, lube oil filters etc. The company has the facilities of metal working, fabric pleating, welding, stitching, molding and all other necessary processes required for manufacture of quality filter elements. All the facilities are available at company's manufacturing unit in GIDC, Ankleshwar which happens to be one of the biggest hubs for chemical and pharmacy companies in Asia. The company is also having tie ups with similar companies in New Delhi, Hyderabad, Ahmedabad and Pune for product distribution and are in process of developing substitutes for various imported filter elements. The company is already in talks with German and Asian companies for technology support in this regard.

The company has launched new hydraulic filters for wind mill which is very cost effective as well as promises very good performance. The company has also launched new SS 316 Filter Housing for Simplex and Duplex filters used in chemical industries. The company is planning to launch new range of Push-Push type filters in November 2016. Asian Filtration Technology as a professionally managed

filters manufacturing company with a very wide and stable client base all over India is planning to export filter elements to Asian and African countries in near future. To conclude, the company plans to become a one stop solution for all filtration requirements of clients.

Its products are used for Filtration, separation and cleaning air in a wide range of products and industries. Major types of industries served by the company are Cement Industries, Fertilizer Industries, Ceramic Industries, Pharmaceutical Industries, Glass Industries, Sand Blasting, Rolling Mills, Vacuum and AC Plant, Food and Beverages, Heavy and General Engg. Constructions, Process Industries, Hospitals/Health care, Photographic film industries and many other similar industries.
